

ADULT & PEDIATRIC ARM/HAND TABLES

Our Arm and Hand Tables are designed to support the arm weight of a patient up to 500 lbs (note: surgical table load capacities may be less) and allows surgeons to perform procedures on a radiolucent, lightweight and rigid platform with exceptional working space.

The device's lightweight carbon fiber construction allows for the device to be easily transported and set up by a single healthcare professional.

Technical Specifications

Adult Hand Table

- Maximum quantified patient weight capacity: 500 lbs (227 kg)
- Dimensions: 30.5" x 15" (77.5 cm x 38.1 cm)
- Table weight: 4.4 lbs (1.2 kg)
- Padding weight:
 - 2.25" (6.35 cm) thick: 2.7 lbs (1.2 kg)
 - 4.14" (10.5 cm) thick: 5.0 lbs (2.3 kg)
- RoHS Compliant
- Product numbers:
 - 2.25" (6.35 cm) thick: 1-1014-001
 - 4.13" (10.5 cm) thick: 1-1014-003

Pediatric Hand Table

- Maximum quantified patient weight capacity: 500 lbs (227 kg)
- Dimensions: 24" x 15" (61 cm x 38.1 cm)
- Table weight: 3.8 lbs (1.2 kg)
- Padding weight:
 - 2.25" (6.35 cm) thick: 2.7 lbs (1.2 kg)
 - 4.13" (10.5 cm) thick: 3.9 lbs (1.8 kg)
- RoHS Compliant
- Product numbers:
 - 2.25" (6.35 cm) thick: 1-1015-001
 - 4.13" (10.5 cm) thick: 1-1015-003
